

# The business in one picture

LetsDoSales - running the document chase for accounting firms, automatically

### The problem

Accounting firms lose their best hours to chasing paper.

• Documents arrive late - the return can't start

• The chasing falls on your most senior preparer

• Files only become complete in the final fortnight

### What we do

We run the chase - so your preparers prepare returns.

### What it costs

One fee to set up, then a monthly fee. Filings never stop - so neither do we.

|                                                                                                                    |                                                                                                                       |                                                                                                                                 |
